

# Display of product information in tabs

Product information – description, template downloads and specifications – can be displayed in a tabs, instead of just listed in a block of text on the product configuration page.

## Table of Contents

<b>Display of product information in tabs</b>	<b>1</b>
<b>Enabling the option on the Admin page</b> .....	<b>2</b>
<b>Using the option on the customer page</b> .....	<b>3</b>

## Enabling the option on the Admin page

To enable this option, click “Product Page Settings” on your main admin page. This will open the “Product info page Settings” page.

## Using the option on the customer page

On the customer page, product information will be displayed in a more organized, tabs-based layout. This is especially useful if you have a significant amount of descriptive text, or other product information text.
